PROFESSIONAL SUMMARY

Game QA Test Engineer with 2+ years of hands-on experience in functional, regression, LiveOps, and cross-platform testing across Android, iOS, and Windows PC. Skilled in defect lifecycle management using Jira, with a strong eye for gameplay, UI/UX, and performance issues. Uses Figma to validate UI implementations against design specs, ensuring pixel-accurate and functional outputs. Passionate about delivering polished, high-quality gaming experiences.

Work Experience

Globalstep Pvt Ltd, Pune | December 2023 – PRESENT

Test Engineer | Game QA

- Tested pre-release and LiveOps builds across Android, iOS, and Windows PC — covering multiple game titles simultaneously.
- Logged 200+ defects in Jira with detailed reproduction steps, screenshots, and severity/priority classification.
- Executed functional, regression, smoke, and sanity testing to validate build stability before each release cycle.
- Validated live game patches, content updates, and new features end-to-end before deployment to production.
- Tested gameplay mechanics, UI elements, and player progression systems to ensure smooth user experience.
- Collaborated with QA team members daily to reproduce, triage, and resolve critical issues under tight deadlines.
- Verified bug fixes post-patch to confirm resolved issues met quality standards before sign-off.
- Participated in daily QA standups and provided structured feedback on game quality and testing progress.
- Used Figma to compare UI implementations against design specs, identifying visual inconsistencies and reporting deviations accurately

Skills

- UI/UX: Figma, Wireframing, Prototyping, UI Design, Design Validation, User Flow Design
- Testing: Manual Testing, Functional Testing, Regression Testing, Smoke Testing, Sanity Testing, Exploratory Testing, LiveOps Testing, Patch Testing, Build Validation Bug
