PROFESSIONAL SUMMARY

Game QA Test Engineer with 2.5+ years of hands-on experience in functional, regression, LiveOps, and cross-platform testing across Android, iOS, and Windows PC. Works primarily on Zynga's Words With Friends, with additional experience on Subway Surfers and Metalstorm. Logged 300+ defects in Jira and uses Figma to validate UI builds against design specs, catching visual and functional deviations before release.

WORK EXPERIENCE

Test Engineer | Game QA - Globalstep Pvt Ltd, Pune

Dec 2023 - Present

- Logged **300+ defects** in Jira across **P1, P2, and P3** severities, each with clear reproduction steps, screenshots, and accurate severity/priority classification.
- Tested pre-release and LiveOps builds across Android, iOS, and Windows PC, covering multiple game titles simultaneously.
- Ran functional, regression, smoke, and sanity suites to validate build stability and sign off each release cycle.
- Validated live patches, seasonal events, reward systems, and content updates end-to-end before production, including edge cases such as timezone mismatches and server lag.
- Identified device-specific crashes, UI scaling issues, and performance drops across Android and iOS device tiers and OS versions.
- Triaged critical issues daily with the QA team under tight deadlines, then verified fixes post-patch before sign-off.
- Used Figma to compare UI implementations against design specs and reported visual inconsistencies precisely.

TITLES TESTED

- **Words With Friends (Zynga), primary title:** Functional, regression, LiveOps, reward verification, multiplayer, and patch stability testing on Android and iOS.
- **Also tested:** Subway Surfers (SYBO Games) - functional and regression testing on Android and iOS; Metalstorm (Starform) - gameplay, combat, UI, and online feature testing.

SKILLS

Testing: Manual, Functional, Regression, Smoke, Sanity, Exploratory, LiveOps, Patch Testing, Build Validation (BVT), Compatibility, Cross-Platform

Bug Tracking: Jira, Defect Lifecycle Management, Reproduction Steps, P1/P2/P3 Severity and Priority Classification, Fix Verification

QA Documentation: Test Case Creation, Test Scenario Design, Player Experience Testing

Tools & Platforms: Jira, Figma (UI Validation), Debug Tools; Android, iOS, Windows PC

UI/UX: Figma, Wireframing, Prototyping, Design Validation, User Flow Design

Game Knowledge: Battle Royale, Open-World, FPS/Tactical Shooter, Strategy (BGMI, GTA V, Clash of Clans, Valorant)

DESIGN PROJECTS (FIGMA)

FurniShop (mobile shopping app), Dining Discount (restaurant discovery platform), ProjectFlow (company reporting dashboard). Details at junedshaikh-portfolio.netlify.app.
